Brand Ecosystem

Trade Funding's visual identity is designed to be both engaging and trustworthy, aligning with its core values of **transparency**, **clarity**, and **approachability**.

At the heart of the brand is a simple yet meaningful ghost character. This icon is a clever choice, as it symbolises transparency—nothing is hidden, everything is clear.

The ghost embodies the brand's commitment to open and honest communication, reinforcing trust with clients at every step.

The logo for Trade Funding, featuring the word "tradefunding" in a dark blue, lowercase, sans-serif font. The letter "f" is stylized with a white, curved line that loops around the top of the letter, resembling a ghost's head or a stylized "u".

The minimalist design of the ghost reflects Trade Funding's mission to make complex financial processes easy to understand. By using a playful yet professional symbol, the brand maintains a light-hearted tone while building credibility in the financial sector.

The colour palette further complements this identity with vibrant and approachable shades, from energising turquoise to trustworthy navy blue, creating a memorable presence that resonates with a diverse audience.

Trade Funding's brand is designed to stand out in the market by fostering a sense of optimism, support, and growth.

The colours and symbols used throughout the branding not only capture attention but also communicate Trade Funding's role as a reliable, forward-thinking partner in business finance.

Brand Logo 01

The logo is the visual representation of the brand's identity. It symbolises the values, personality, and uniqueness, serving as the cornerstone of the visual identity.

To ensure versatility and adaptability, we've developed different variations of the logo. These variations maintain the essence of the brand while accommodating various contexts and applications.

IMPORTANT:

The primary logo should be used in most applications. The secondary, vertical logo is for specific use cases, such as narrow spaces or vertical layouts, and should only be used when *absolutely necessary*.
